## Downloadkey Update Version 1.26

With the new Downloadkey Update Program all necessary data are automatically updated in your computer in one step.

The Downloadkey update will update to

- Key-Firmware v4.3 and
- KeyConfiguration v1.14.

Update description:        - Updater optimizations for Windows XP and VISTA operating systems.

### Procedure:

1. Data Backup of Downloadkey Data .....	4
2. Downloadkey Updating.....	5
3. Checking/Restoring Downloadkey Data.....	7

**Requirement:**        Windows XP or VISTA must be installed on the computer in order to carry out the update.

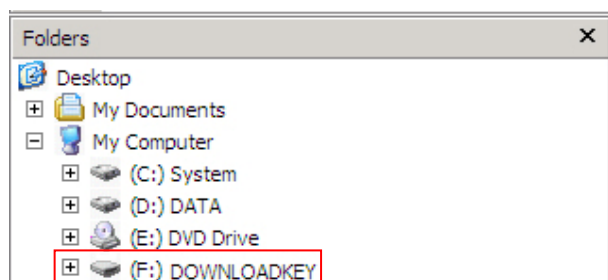

You must have the "KeyConfiguration" software installed on you computer in order to carry out the update of the Downloadkey. You will find this software on the product CD belonging to your Downloadkey.

## 1. Data Backup of Downloadkey Data

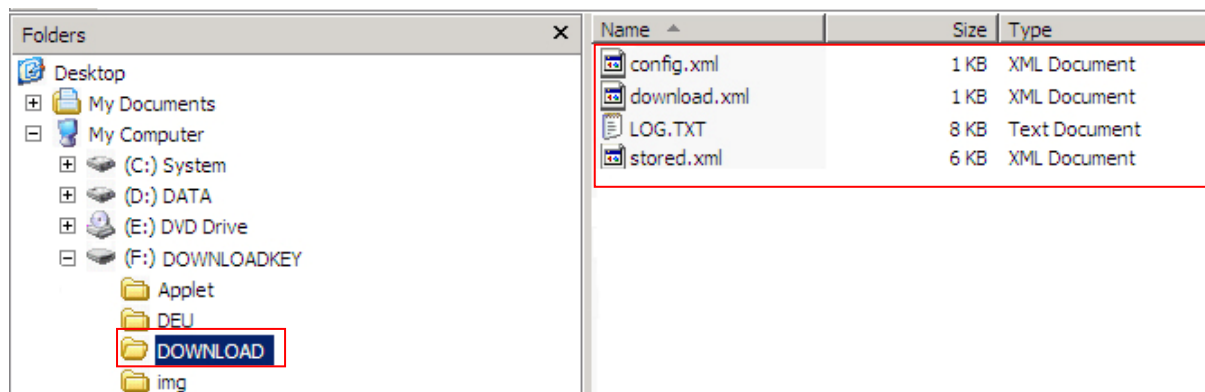

- 1.1 Create the folder, e.g. "Data Backup" in the installation directory of the "KeyConfiguration" software.

Note: Normally the software for the configuration of the Downloadkey is installed under "C:\Programme\KeyConfiguration".

- 1.2 Connect the Downloadkey via the USB interface to your PC.  
The DOWNLOAD drive appears in the Explorer.

- 1.3 Click on the DOWNLOADKEY drive in the Explorer and open the DOWNLOAD subdirectory.

All data in the DOWNLOAD directory must be backed up which is done by copying all entries in a directory on your hard disk.  
(e.g. C:\Program Files\ KeyConfiguration \DataBackup)

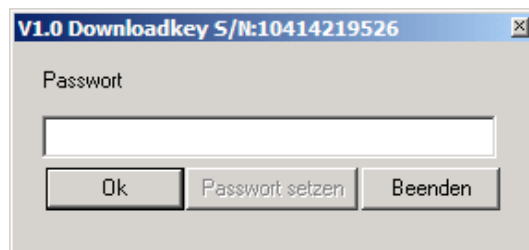

## 2. Downloadkey Updating

### Note!

Before starting an update you must carry out a data backup in the Downloadkey!  
(See point 1 – Data Backup of Downloadkey Data)

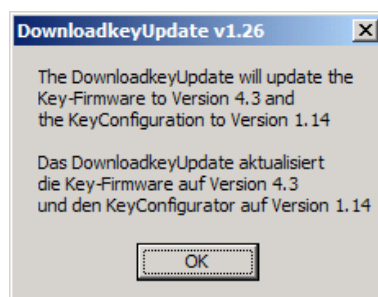

**We recommend:** Connect the Downloadkey directly to the computer and not via a USB Hub.  
Otherwise the software cannot recognize the Downloadkey.

### Optional

After you have set a password for the Downloadkey, the inquiry for the password then follows. Please enter this and confirm with **OK**.

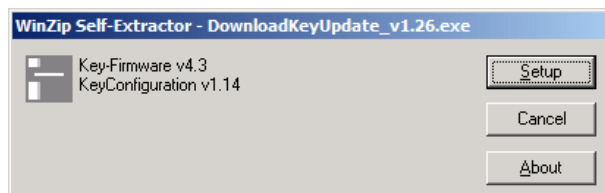

2.1 The **Update started** by double-clicking on the "**DownloadkeyUpdate\_v1.26.exe**" file

### 3. Checking/Restoring Downloadkey Data

Click on the TIS-Compact drive in the Explorer and open the submenu "DOWNLOAD". Check whether all pre-saved data are in the DOWNLOAD directory.

In case existing data are lost during the update, copy these data from the written backup copy (e.g. C:\Program Files\ KeyConfiguration \data backup) in the "DOWNLOAD" folder on the Downloadkey.

#### **Note!**

Only after checking/restoring the data is the complete update concluded!
